

## APM Project Risk Management Levels 1 & 2 Certificates

Risk management is a distinct and specific area within APM's Body of Knowledge and a key control function within any project or programme. APM offers Project Risk Certificates at Levels 1 and 2, which are designed for project and programme managers who are involved in project risk management at any level. This brochure describes Provek's range of courses to enable delegates to achieve both Level 1 and Level 2 certificates. Obtaining the Level 1 certificate is sufficient for an individual to contribute effectively towards the formal process of project risk management. The Level 2 certificate is a written examination designed to determine an individual's capability in project risk management, sufficient to allow an individual to undertake formal project risk management.

### Learning formats available

Choose from the following learning formats for Level 1 to suit your needs. All formats require some hours of individual effort outside of the classroom, which increases significantly from classroom to blended (mix of classroom and self-study) to directed self-study learning formats. Commitment of the individual to the appropriate level of self-study is essential for the blended and wholly self-study formats.
