

APM Risk Management Certificates

Developing your future project managers
for tomorrow

Qualification overview

APM Risk management is a distinct and specific area within APM's Body of Knowledge and a key control function within any project or programme. APM offers Project Risk Certificates at Levels 1 and 2, which are designed for project and programme managers who are involved in project risk management at any level.

Who is this qualification for?

The APM Risk Management Certificates are for project managers, work package leads, programme managers, or key project staff involved in risk management.

Pre-requisites

Level 1: A minimum of 6 months of practical project experience and good basic project management skills and knowledge.

Level 2: Level 1 Certificate or demonstrable knowledge of Level 1 syllabus.

Obtaining the Level 1 certificate is sufficient for an individual to contribute effectively towards the formal process of project risk management.

The Level 2 certificate is a written examination designed to determine an individual's capability in project risk management, sufficient to allow an individual to undertake formal project risk management.

Highly interactive virtual training

The Risk Level 1 and Level 2 course is a tutor-led 'virtual' classroom style delivered over Zoom. The Zoom tool provides a powerful combination of video, virtual whiteboards and breakout rooms for small group exercises. It simulates very closely a classroom learning environment but with the advantage of geographic flexibility and zero travel costs.

Our expert trainers deliver highly interactive and enjoyable training with participative exercises, case studies and revision questions.
